16. Abstract (Limit: 200 words)

The Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) of 1980 PL 96-510 (commonly known as Superfund) mandates in Section 103(c) that certain persons notify the U.S. Environmental Protection Agency (EPA) by June 9, 1981 of the existence of sites where hazardous wastes from industries, businesses, government, hospitals, and other sources are stored, treated or disposed of. This document comprises a listing of 8,755 notifications of hazardous waste sites. For each notification, the listing summarizes the location, the persons required to notify, the amount and type of any hazardous waste to be found on the site reported, and any known or suspected releases of hazardous wastes. The CERCLA 103(c) notification was mandated to help EPA and State and local governments remedy problems created by uncontrolled hazardous waste disposal. This document contains ten volumes, one for each EPA region. Within each volume, the notifications are presented alphabetically by state and site name within each state, respectively.

Preface

Section 103(c) of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) of 1980, states that any person who "owns or operates or who owned or operated, or who accepted hazardous substances for transport and selected, a facility at which hazardous substances are or have been stored, treated, or disposed of shall, unless such facility has a permit issued under, or has been accorded interim status under, subtitle C of the Solid Waste Disposal Act, notify the Environmental Protection Agency (EPA) of the existence of such facility", within 180 days of enactment of the Act (June 9, 1981). The following report contains information from notifications received through March 1982.

The EPA received 8935 notifications. Included in this report are 8755 of the notifications. Of the 180 notifications not presented in this report, 163 are excluded due to a request from the notifier that their information remain confidential. The Agency is reviewing these requests to determine whether confidentiality will be denied or accepted. The 17 remaining notifications were not included because the data provided was incomplete. The notifiers have been contacted and requested to supply the missing information, but responses have not been received by this date.

The information presented in this report is the information which notifiers submitted to the EPA. It should be noted that this list represents notifications of hazardous waste sites which may have been reported in duplicate and that the Agency has not verified the accuracy of those notifications. In addition, notifications should not be interpreted as an affirmation of the existence of a hazardous waste site. Due to the short deadline, certain firms who notified the EPA may have done so to meet the legal requirement and have since determined they were exempt from notifying.

The following list of notifications of hazardous waste sites is in alphabetical order by the name of the site under the State and EPA Region where it is physically located. The following pages explain the format of the report, the definitions of the data items and a list of the data values for each data item as needed.

INFORMATION FORMAT

The information format used in this report is illustrated below, followed by a description of the individual information items. In addition, Figures 1, 2 and 3 provide definitions and values for information items that may have been used by persons required to report waste sites under CERCLA.

* * * * *

SITE IDENTIFICATION: (1)

WASTE AMOUNT: (5)
FACILITY AREA: (6)
FACILITY TYPE: (7)

FROM: (10) TO: (10)

RELEASES: (11)

PERSON REQUIRED TO NOTIFY: (2)

WASTE SOURCE: (8)

WASTE TYPES: (9)

STATUS: (3)

CONTACT: (4)

* * * * *

1. Name and actual physical location of the site.

2. Name and address of the person or organization required to notify.

3. Description of the relationship of the person required to notify to the site (See Figure 2 for item values).

4. Name, title (if applicable) and business telephone number of the person to contact regarding information submitted to EPA.

5. The estimated combined quantity of hazardous wastes at the site.

6. The estimated combined area which the facilities occupy at the site.

7. Indication of the facility types found at the site (See Figure 2 for item values).

8. Industrial origin of the waste if known (See Figure 2 for item values).

9. The type of hazardous waste that has been treated, stored or disposed at the site. The indication can be general (e.g., organic, heavy metals, etc.) or reference a specific EPA four-digit number corresponding to each hazardous substance listed in regulations under Section 3001 of the Resource Conservation and Recovery Act (RCRA). (See Figure 2 for general item values and Figure 3 for specific item values).

10. The years that hazardous substance treatment, storage and disposal began and ended at the site.

11. Indication of any known, suspected or likely releases of wastes to the environment (See Figure 2 for item values).

Figure 1
Information Item Definitions

disposal: the discharge, deposit, injection, dumping, spilling, leaking, or placing of any solid waste or hazardous waste into or on any land or water so that such substances or any constituent thereof may enter the environment or be emitted into the air or discharged into any waters, including ground waters.

environment: (A) the navigable water, the waters of the contiguous zone, and the ocean waters of which the natural resources are under the exclusive management authority of the United States under the Fishery Conservation and Management Act of 1976, and (B) any other surface water, ground water, drinking water supply, land surface or subsurface strata, or ambient air within the United States or under the jurisdiction of the United States.

facility: (A) any building, structure, installation, equipment, pipe or pipeline (including any pipe into a sewer or publicly owned treatment works), well, pit, pond, lagoon, impoundment, ditch, landfill, storage container, motor vehicle rolling stock, or aircraft, or (B) any site or area where a hazardous waste has been deposited, stored, disposed of, or placed or otherwise come to be located; but does not include any consumer product or any vessel.

hazardous waste: (for purposes of the notification requirement); means any hazardous waste having the characteristics identified under or listed pursuant to Section 3001 of RCRA (but not including any waste the regulation of which under RCRA has been suspended by Congress).

owner or operator: (A) in the case of an onshore facility, any person owning or operating such facility, and (B) in the case of any abandoned facility, any person who owned, operated, or otherwise controlled activities at such facility immediately prior to such abandonment.

person: an individual, firm, corporation, association, partnership, consortium, joint venture, commercial entity, United States Government, State, municipality, commission, political subdivision of a State or any interstate body.

release: any spilling, leaking, pumping, pouring, emitting, emptying, discharging, injecting, escaping, leaching, dumping, or disposing into the environment.

site: the location at which hazardous wastes were stored, treated, or disposed of by persons required to notify under Section 103(c). This includes all contiguous land, structures, other appurtenances, and improvements on the land, used for treating, storing, or disposing of hazardous wastes. A site may consist of several treatment, storage, or disposal facilities.

storage: the holding of hazardous waste for a temporary period at the end of which the hazardous waste is treated, stored, or disposed elsewhere.

Figure 1 (cont'd)

transport or transportation: the movement of a hazardous substance by any mode, including pipeline (as defined in the Pipeline Safety Act), and in the case of a hazardous substance which has been accepted for transportation by a common or contract carrier, the term "transport" or "transportation" shall include any stoppage in transit which is temporary, incidental to the transportation movement, and at the ordinary operating convenience of a common or contract carrier, and any such stoppage shall be considered as continuity of movement and not as the storage of a hazardous waste.

treatment: any method, technique, or process, including neutralization, designed to change the physical, chemical or biological character or composition of any hazardous waste to neutralize such waste, or so as to recover energy or material resources from the waste, or to render such waste non-hazardous, or less hazardous; safer to transport, store, or dispose of; or amenable for recovery, or storage, or reduced in volume. Such term includes any activity or processing designed to change the physical form or chemical composition of hazardous waste so as to render it non-hazardous.

waste quantity: the actual or estimated size of the area affected (such as square feet or acres) and/or amount of waste (such as gallons or cubic feet) for the various treatment, storage or disposal facilities used at a site.

waste type: the type of hazardous substance that has been treated, stored, or disposed at a site.

Figure 2
Information Item Values

Item 3 -- STATUS

- present owner
- present operator
- past owner
- past operator
- transporter
- volunteer

Item 7 -- FACILITY TYPE

- piles
- land treatment
- landfill
- tanks
- impoundment
- underground injection
- drums, above ground.
- drums, below ground
- other

Item 8 -- WASTE SOURCE

- mining
- construction
- textiles
- fertilizer
- paper/printing
- leather tanning
- iron/steel foundry
- chemical, general
- plating/polishing
- military ammunition
- electrical conductors
- transformers
- utility companies
- sanitary/refuse
- photofinish
- lab/hospital
- unknown
- other

Item 9 -- WASTE TYPES*

- organics
- inorganics
- solvents
- pesticides
- heavy metals
- acids
- bases
- PCBS
- mixed municipal waste
- unknown
- other

Item 11 -- RELEASES

- known
- suspected
- likely
- none

*The information item can also reference a specific four-digit number corresponding to each hazardous substance listed in regulations under Section 3001 of the Resource Conservation and Recovery Act (RCRA). The hazardous waste codes are shown in Figure 3.
